

As consumer habits continue to shift more toward on-line orders, the e-commerce fulfillment and parcel shipment process is ever evolving. The customer experience is a key component that drives brand loyalty and customer retention.

Designs that can mitigate the shifting & migration of items, along with separating fragile vs heavier items, provide the greatest likelihood your products will arrive damage free to your valued customers.

At ITB Packaging, we incorporate our proprietary technology to provide an integrated void fill & partition single-sku solution. Our ability to separate and keep liquid upright and isolated from other items, provides the customer with an ergonomically friendly and pleasant unboxing experience.

Our solutions are 100% recyclable and reusable, and significantly reduce warehouse & transportation space, optimize distribution center environment via single-sku fully integrated dunnage. Our solutions can integrate into automation and fulfillment process within your distribution centers, thus providing labor, handling, and productivity efficiencies.

**Protectapak**  
*Integrated Dunnage Solution*

A simple three step process keeps your items secure.

### The ITB Advantage

- Sustainability
- Mitigate Damage
- Product separation
- Unsurpassed protection
